

MEGAWINS COIN WHITEPAPER

Global Lottery Platform × Automatic Market Purchase × MWC Ecosystem

An MWC auto-market-purchase ecosystem linked to real payments on a global lottery platform

Chapter 1 & Project Vision: Executive Summary

Definition

MWC is not a simple issued token but an ecosystem token linked to real payments.

Vision

Connect global lottery and game participation payments to real market demand for MWC.

Ecosystem

Users, platform revenue and token demand are designed to grow together.

MWC Project Overview

Lottery Platform	MEGA Wheel (Play & Win on the Platform)

Market Problems and the MWC Solution

Existing Market Problems

Real utility is weak in many existing crypto projects.

Token demand is often separated from actual platform revenue.

Low liquidity weakens market confidence and scalability.

Lottery platforms struggle to create repeat participation.

Platform payments can be linked directly to MWC demand.

The automatic purchase engine creates structured buy flow.

Referral rewards and user incentives strengthen retention.

QUICK DRAW increases repeat visits and payment activity.

MWC / MEGA WINS Solution

Platform Participation

Payment Occurrence

Payment Verification

MWC Automatic Purchase

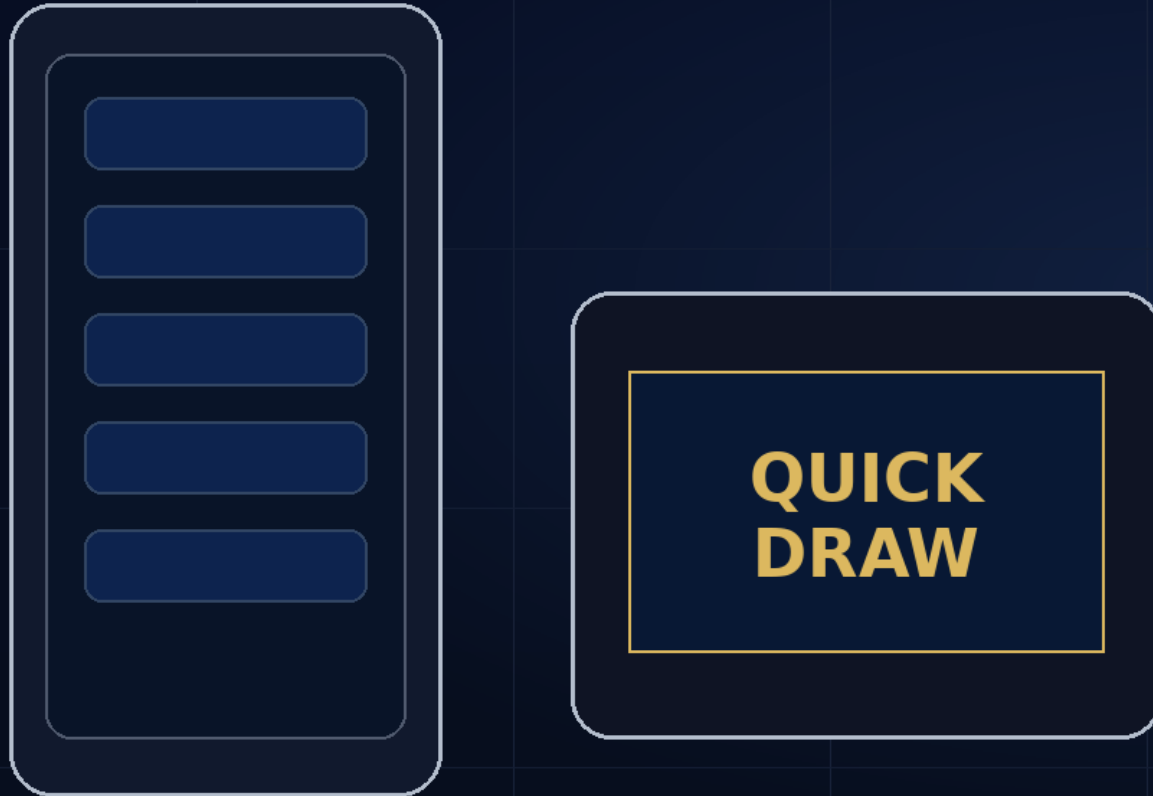

Market Demand

Liquidity Expansion

Ecosystem Growth

Automatic purchasing supports market demand but does not guarantee token price appreciation.

MEGA WINS Platform & QUICK DRAW

MEGA WINS Platform

A global PWA-based mobile lottery platform designed for simple access, user rewards and repeat participation.

QUICK DRAW (Every 5 Minutes)

A short-cycle draw game designed to increase engagement, repeat visits and platform activity.

Core Goal

Build a payment-driven ecosystem where user activity on MEGA WINS can support MWC market demand.

Key Experience Elements

- Free-ticket onboarding
- Buy 3 → activate 13-ticket participation
- Direct and automatic number selection
- Referral and rewards system

User Participation & Reward System

Referral rewards are counted only after a friend completes their first paid 3-ticket purchase.

Referral Reward Matrix

Key rule: referral rewards are recognized only after a friend completes the first paid 3-ticket purchase.

1 Friend
3 Free Tickets

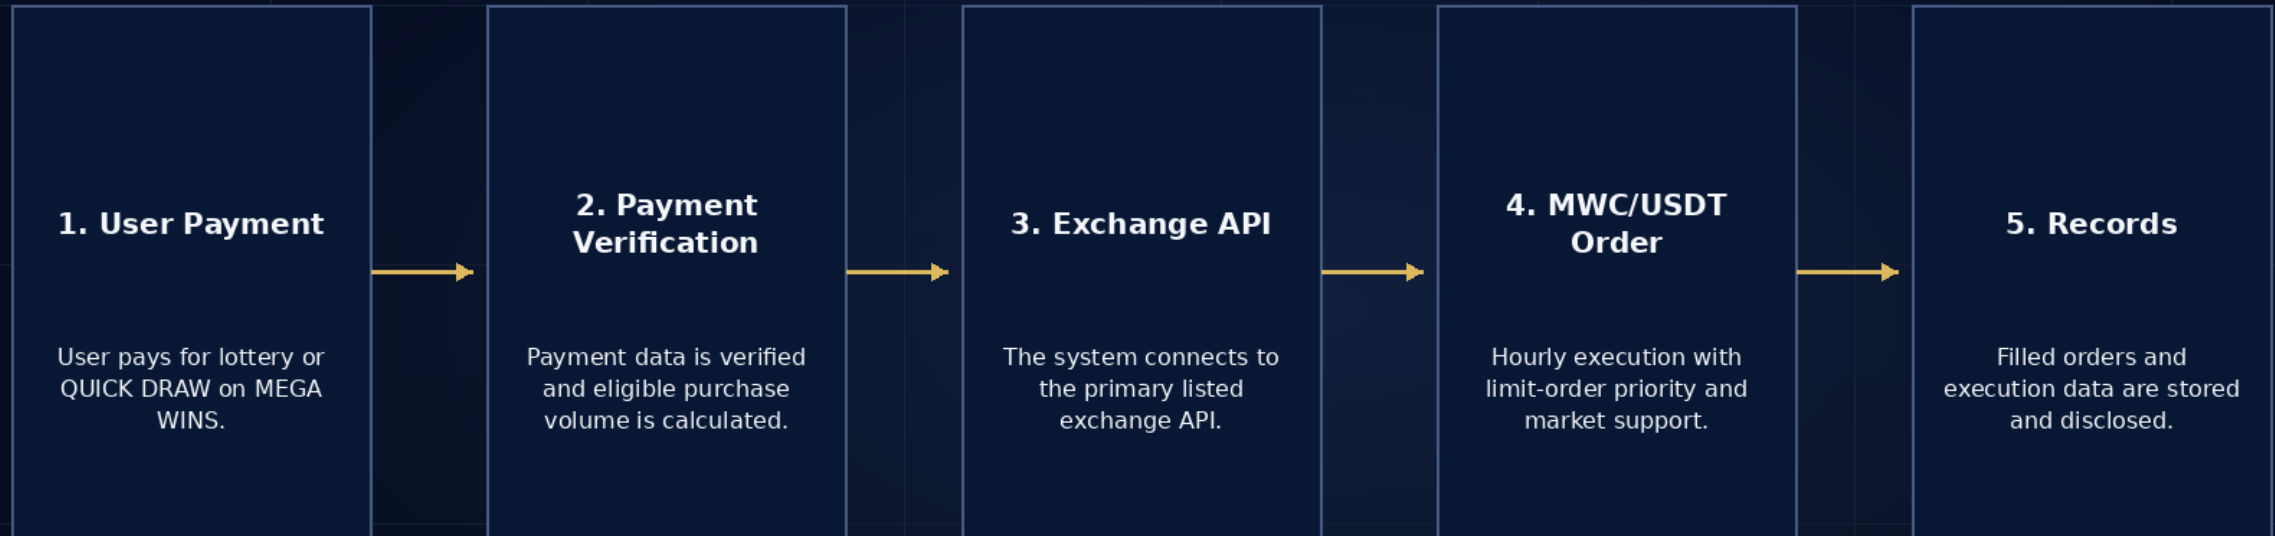

5 Friends
+10 Tickets

10 Friends
+30 Tickets

30 Friends
+100 Tickets

Core Innovation: MWC Automatic Purchase Mechanism

Automatic Purchase System Flow

System Features

Anti-slippage logic

Split orders to reduce impact

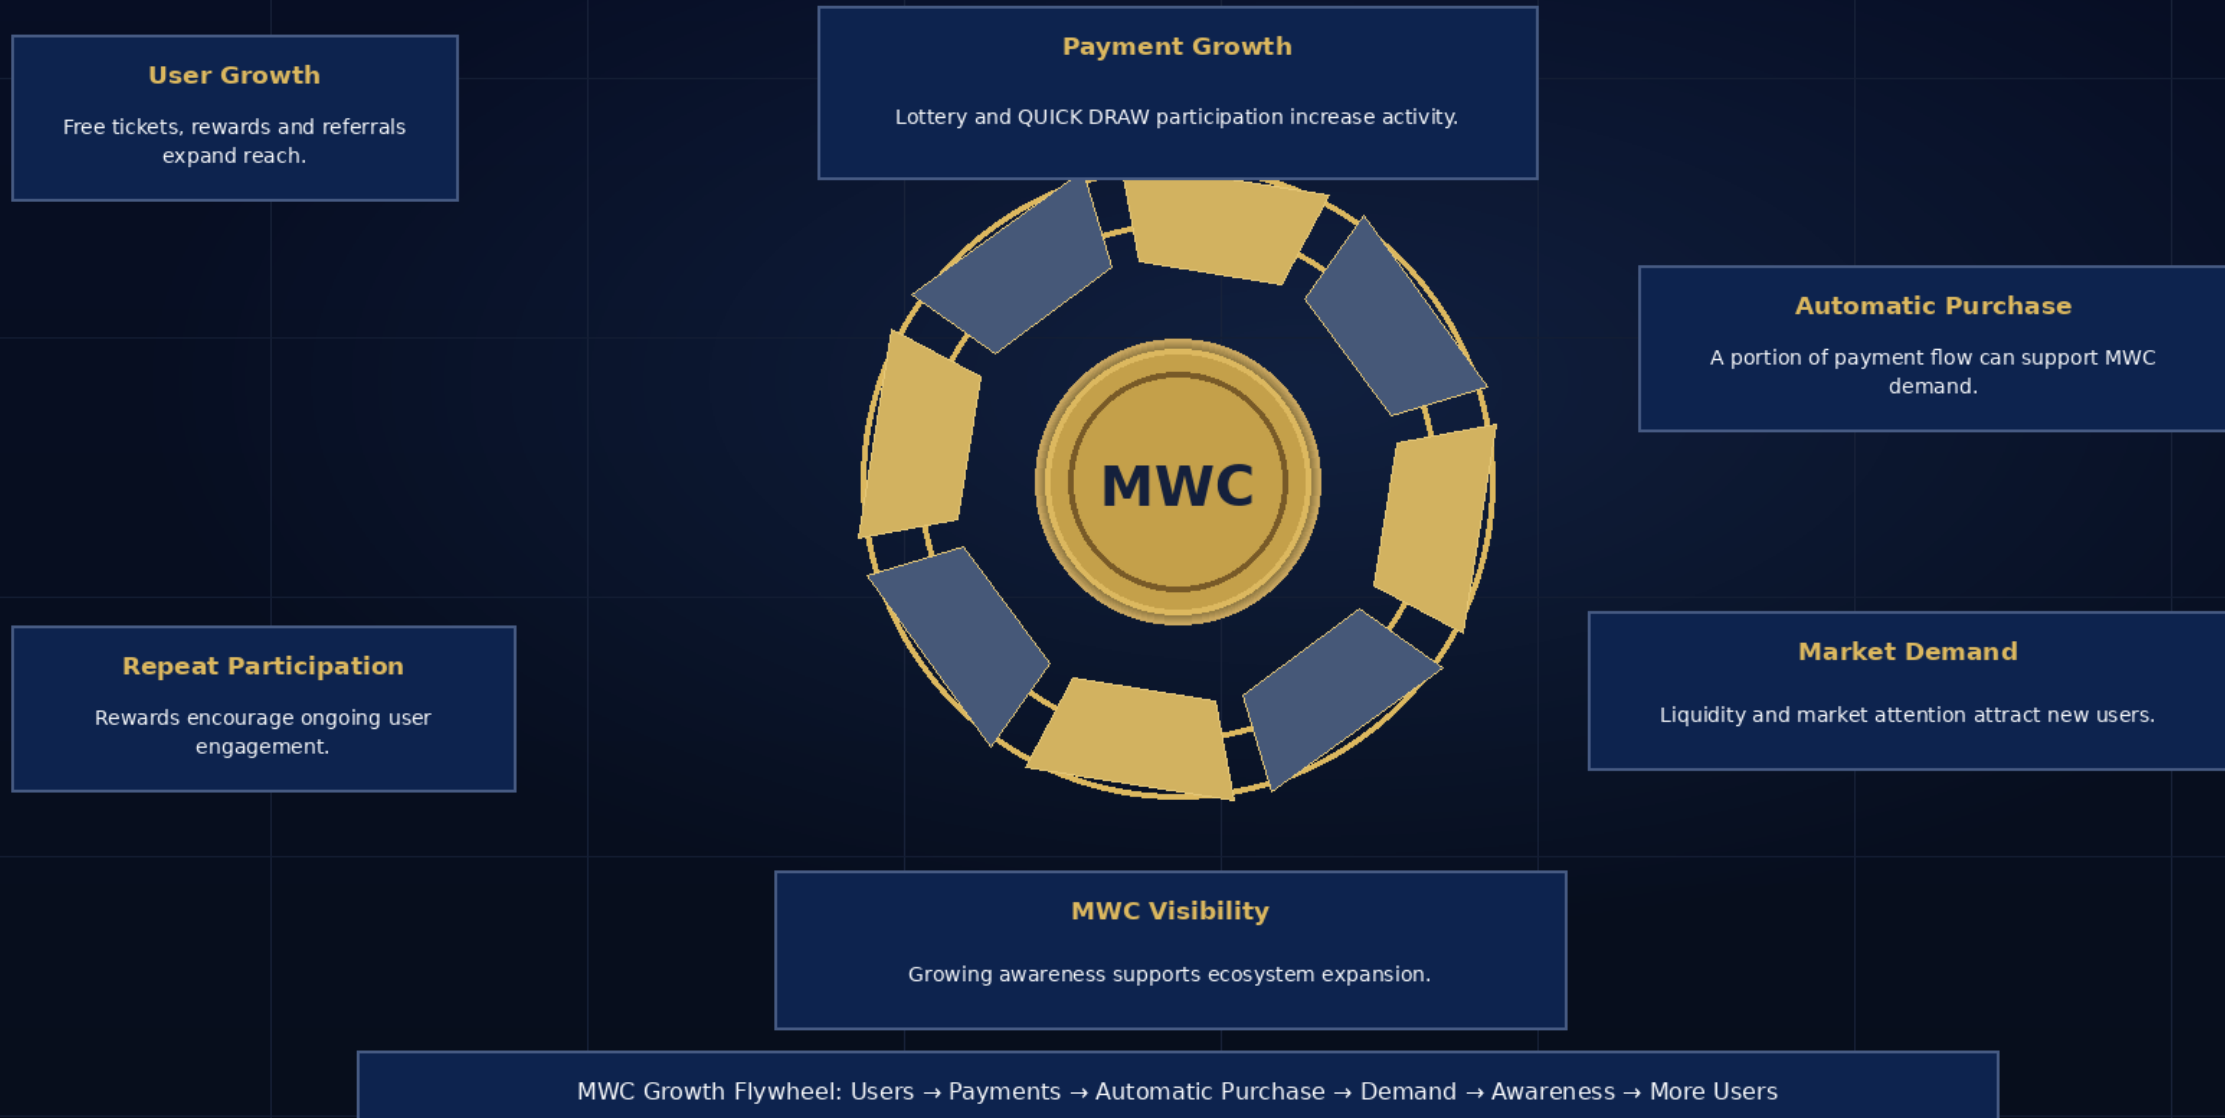

Exchange-failure queue and retry

Admin monitoring dashboard

Automatic purchase logs and fill records

Notice: automatic purchasing is designed to form market demand; it does not guarantee MWC price appreciation.

Chapter 9. MWC Growth Flywheel

Platform Technology Architecture (Tech Stack)

2. Platform Layer

Member management, lottery issuance, number generation, draw, prize verification and CMS.

4. Blockchain Layer

Polygon network, MWC smart contract, wallets, distribution, lockup and vesting.

1. User Layer

PWA, mobile browser, account, lottery purchase, QUICK DRAW, rewards and notifications

2. Platform Layer

Member management, lottery issuance, number generation, draw, prize verification and CMS

3. Automatic Purchase Layer

Payment data, purchase calculation, exchange API, orders, fill records and retries

4. Blockchain Layer

Polygon network, MWC smart contract, wallets, distribution, lockup and vesting

5. Data & Security Layer

Authentication, API security, encrypted exchange keys, audit logs and backups

MWC Token Specifications & Utility

Token Specification	
Token Name	MEGAWINS COIN
Ticker	MWC
Blockchain	Polygon
Token Standard	ERC-20 compatible
Total Supply	1,000,000,000 MWC
Decimals	18
Official Site	MEGAWINSCOIN.COM
Linked Platform	MEGA WINS (https://super-wins.pages.dev/)

Utility		
Confirmed Utility		
MEGA WINS ecosystem foundation	Exchange trading	User rewards
Planned Utility		
Platform payment linkage	Global promotion / membership	Partner-platform integration and staking

MWC Token Specifications & Utility

Token Specification

Token Name	MEGAWINS COIN
Ticker	MWC
Blockchain	Polygon
Token Standard	ERC-20 compatible
Total Supply	1,000,000,000 MWC
Decimals	18
Additional Mint	Not planned / fixed-supply model
Official Site	MEGAWINSCOIN.COM
Linked Platform	MEGA WINS

Utility Framework

Confirmed Uses

Future Expansion

All utility expansion will follow legal, operational and platform-readiness requirements.

Token Economy & Distribution Policy

Token Allocation

Categories

Ecosystem rewards, platform operation, automatic purchase & liquidity, global marketing, development, exchange listing, partnerships, investor allocation, team/advisors and reserve.

		Percentage	
• Ecosystem Rewards	25%	• Exchange Listing	5%
• Platform Operation	15%	• Partnerships	5%
• Auto Purchase & Liquidity	20%	• Investor Allocation	5%
• Global Marketing	10%	• Team & Advisors	3%
• Development	10%	• Reserve	2%
		Total 100%	

Distribution & Lockup

Initial Circulating / Non-circulating Supply:

Initial circulation 20% / Non-circulating supply 80%

Investor & Team Lockup / Vesting:

Investors: 3-month lockup then 12-month monthly vesting. Team: 12-month lockup then 24-month monthly vesting.

Transparency:

Admin and lockup wallets will be disclosed with regular circulation reports.

Business Model & Growth Scenario

Lottery Sales

QUICK DRAW

Subscriptions

Fees & Partnerships

Revenue Model: lottery sales, QUICK DRAW participation, subscriptions, advertising, payment fees and partnerships.

Conservative

Slower user growth, lower conversion rate, limited QUICK DRAW usage and smaller automatic-purchase volume.

Base

Planned marketing execution, stable first-purchase conversion, repeat-user formation and exchange liquidity established.

Expansion

Active referral network, fast global user growth, repeated QUICK DRAW usage and additional exchanges / partners.

All projections are illustrative business scenarios and do not guarantee users, revenue, or token price performance.

Exchange & Liquidity Strategy

Initial Listing & Liquidity

MWC/USDT trading support, CEX and DEX use, exchange API integration and initial liquidity setup.

Market Expansion

Additional exchange listing discussions, global accessibility and liquidity enhancement initiatives.

Market Stabilization

Automated order management, split orders, liquidity checks, risk controls and transparent reporting.

Stable trading support

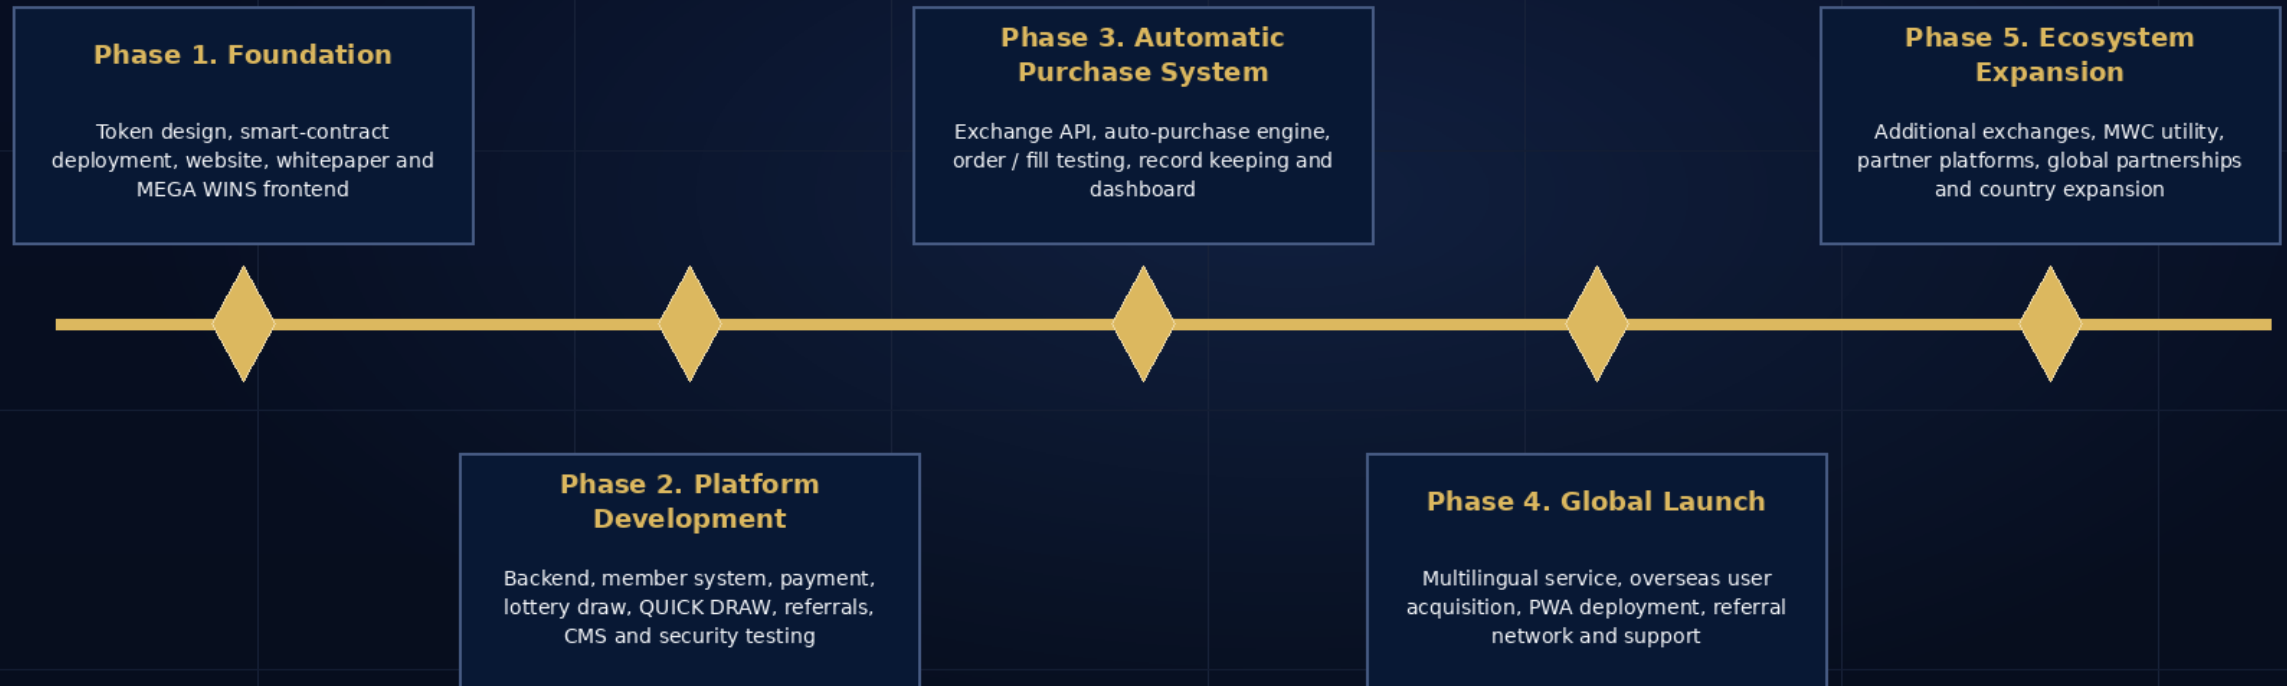

Global user access

Liquidity monitoring

Transparent execution reports

Exchange listings and liquidity programs are subject to exchange review, market conditions and regulatory requirements.

Project Roadmap

The roadmap is presented by phase; timing may be adjusted based on development, compliance and partner readiness.

Operational Transparency, Security & Risk Management

Operational Transparency

- Automatic purchase execution reports
- Platform payment statistics
- MWC circulation and lockup disclosure
- Monthly operating reports
- Smart-contract audit results

Security Framework

- API security and key encryption
- Administrator privilege separation
- Multi-signature wallets
- Log monitoring and backup
- Incident response process

Risk & Mitigation

- Price volatility, listing uncertainty, liquidity shortage, regulation changes, licensing, development delays and payment partner issues.
- Mitigation: legal review, staged rollout, liquidity monitoring, security audits, operating reports and clear separation of confirmed vs planned items.

Conclusion

MEGAWINS COIN is designed as an ecosystem project that connects real user activity and payment flow from a global lottery platform to market demand for MWC.

MEGA WINS platform expansion can provide a foundation for MWC ecosystem growth, linking users, the platform, exchanges and global partners.

Executive To-Do Matrix

1. Token

Finalize listing strategy, smart-contract audit and circulation disclosure.

2. Platform

Complete backend, payment, draw, reward and automatic-purchase integration.

3. Operation

Prepare licensing review, restricted-country policy, KYC/AML and privacy framework.
